NEHAL THAKKAR

ASPIRING DATA ANALYST

Surat, Gujarat, India | 7046944878 | nehalthakkar520@gmail.com

PROFESSIONAL SUMMARY

Dedicated and detail-oriented B.Com student and aspiring Data Analyst with strong foundational expertise in Python, SQL, and Microsoft Excel. Experienced in transforming raw data into actionable insights through rigorous data cleaning, exploratory data analysis, dynamic reporting, and advanced data visualization. Proven ability to build end-to-end academic and practice projects, leveraging analytical frameworks to solve complex business challenges. Eager to bring a strong analytical mindset, technical adaptability, and passion for data-driven decision-making to an entry-level Data Analyst role within a progressive organization.

TECHNICAL SKILLS

Programming & Databases: Python, SQL, MySQL, Pandas, NumPy

Data Analysis & Tools: Excel (Pivot Tables, VLOOKUP, XLOOKUP, INDEX-MATCH)

Data Operations: Data Cleaning, Transformation, Validation, ETL Basics

Reporting & Viz: Dashboards, BI Reporting, KPI Tracking, Data Visualization

Core Competencies: Analytical Thinking, Problem Solving, Statistical Analysis, Business Acumen

PROJECTS & CASE STUDIES

1. Data Intelligence Dashboard — Microsoft Excel

- Cleaned, transformed, and structured large-scale customer transaction datasets to ensure maximum data integrity and consistency.
- Designed interactive summary tables, dynamic KPIs, and management dashboards using advanced Excel lookups and Pivot Tables.

2. Smart Data Analyzer — Python, Pandas, NumPy

- Developed robust Python scripts using Pandas and NumPy to ingest, clean, and execute exploratory data analysis on complex datasets.
- Automated data filtering, missing-value handling, and generated structured analytical summaries to streamline decision-making.

3. Enterprise SQL Data Analysis System — MySQL

- Architected relational database schemas and executed comprehensive CRUD operations, filtering, grouping, and subqueries.
- Implemented complex multi-table joins, aggregate functions, and string/date manipulation queries to extract crucial business intelligence.

4. Super Store Business Performance Dashboard — Advanced Analytics & Viz

- Engineered an end-to-end retail sales and performance analytics dashboard incorporating structured data preparation and modeling.
- Integrated custom calculated measures and interactive visual layers to monitor profit margins, regional trends, and customer segments.

EDUCATION & ACADEMIC TRAINING

Veer Narmad South Gujarat University (VNSGU), Surat — Currently Pursuing
Bachelor of Commerce (B.Com)

Comprehensive Data Analyst Professional Training Program — Completed
Modules: Python Programming, Advanced SQL, MySQL, Microsoft Excel, Data Cleaning

RELEVANT COURSEWORK

- Python Programming for Data Analytics
- Relational Databases & SQL Optimization
- Advanced Excel Formulas & Dashboards
- Data Cleaning & Exploratory Analysis
